

Property Alert System

Many people don't think to check their property records. They sign up for all types of services to protect social security numbers and bank account numbers....

Fraud in land records is difficult to prevent. State law requires Clerks to record documents as long as the document meets statutory requirements. Without a title search, a land owner may not know of a fraudulent recording for years...*until now...*

NewVision is pleased to announce the new **Property Alert System**. Residents sign up on-line to get an automated email alert if a document is recorded with a name or property identification number that matches data that the resident enters when subscribing. The system automatically generates an email alert upon verification of a recorded document with a matching name or number. Subscribers only receive alerts when there is an exact match, so there's not a concern with residents receiving unnecessary emails that might result in calls to the Clerk's office.

Other NewVision Solutions include ...

- Official Records
- eRecording
- Dog License
- Marriage License
- Disaster Preparedness
- Disaster Recovery
- Web Hosting
- Web Subscription Search
